### EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Ellen Marcie Emas on July 14, 2005.

The application has been amended as follows:

- ♦ Cancel claims 1-14, 20-35, and 65.
- ♦ Claims 38 and 40 have <sup>been amended to correct</sup> ~~changed~~ the status as follow:

38. (Original) A powder molding apparatus according to Claim 36, wherein said fixing means are introduced between said die and die set, and are configured of a fixing bush for causing taper fitting of said die and die set.

40. (Original) A powder molding apparatus according to Claim 36, wherein said fixing means are introduced between said die and die set, and are configured of a fluid pressure fixing member which presses and fixes said die to said die set by pressurizing a pressure fluid filled therein.

2. Claim 15 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 38 and 40, directed to the species of fixing means no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim. In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the

***Allowable Subject Matter***

3. Claims 15-19 and 36-44, 46-64 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest a powder molding apparatus having a mold transporting mechanism for transporting the mold, which includes a die, an upper punch and a lower punch through different molding stations, and linking means for detachably linking the punches to the compression driving mechanism, wherein the linking means is movable in direction orthogonal to the compression driving direction of the punches.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
